

# Edgar Chirivella

Glasgow, United Kingdom • [hola@edgarchirivella.com](mailto:hola@edgarchirivella.com) • <https://www.linkedin.com/in/edgar-chirivella>

## PROFILE

---

Software Engineer with strong experience in backend and frontend development, building high-performance systems and user-focused applications.

## EXPERIENCE

---

### Software Engineer II

Oct 2022 - Present

Auth0 (Okta)

- Led the design and rollout of M2M Access for Organizations, and delivered two critical security fixes that protected customers from high-impact vulnerabilities.
- Contributed to core IAM features, including JWT for Client Authentication, and Fine-Grained Machine-to-Machine Token Quotas, taking part in design discussions and shaping solutions later implemented at scale through performance tuning, query optimization, and load testing.
- Participated in technical interviews and provided feedback on candidates' skills and team fit.

### Backend Developer (Engineer II)

Mar. 2022 - Oct. 2022

Getir

- Developed backend services in Node.js to support franchise operations, providing store managers with tools to manage staffing, inventory, and day-to-day workflows.
- Designed and delivered new features end-to-end, from architecture diagrams involving multiple microservices and databases, to implementation.
- Deployed services to AWS EKS Kubernetes clusters by writing Dockerfiles and Kubernetes manifests.

### Backend Developer

Feb. 2021 - Mar. 2022

Vehnet

- Developed backend services in .NET and Node.js for a vehicle logistics platform, integrating with multiple databases and using event sourcing for inter-service communication.
- Reduced infrastructure costs by containerizing services, enabling migration from Azure App Service to virtual machines.

### Frontend Developer

Mar. 2020 - Feb. 2021

Vehnet

- Owned frontend development of React and React Native MVP applications for port vehicle management, refining an early prototype into a polished product in close collaboration with the CTO and customers.

### Frontend Developer

Sep. 2018 - Mar. 2020

Okode

- Developed web and mobile applications with Angular and Spring Boot for a leading insurance company, working closely with stakeholders to translate business requirements into technical solutions.

## EDUCATION

---

### B.Eng. Civil Engineering

2013 - 2019

Universitat Politècnica de València

- Engineering degree accredited by ABET, an international organization based in the United States that certifies quality educational programs in engineering and technology.

## SKILLS

---

Backend Development | Distributed Systems | Identity and Access Management (IAM) | OAuth2 | OpenID | Kubernetes | Docker | AWS | Azure | PostgreSQL | MongoDB | Node.js | TypeScript | React | React Native | Datadog | Snowflake
